

## Supporting Teachers, Empowering Learners

Why Corwin Mathematics? We've all heard this—"either you are a math person, or you are not." At Corwin Mathematics, we believe ALL students should have the opportunity to be successful in math! Trusted experts in math education such as Linda Gojak, Ruth Harbin Miles, John SanGiovanni, Skip Fennell, Gary Martin, and many more offer clear and practical guidance to help all students move from surface to deep mathematical understanding, from favoring procedural knowledge over conceptual learning, and from rote memorization to true comprehension. We deliver research-based, high quality content that is classroom-tested and ready to be used in your lessons – today!

Through books, videos, consulting, and online tools, we offer a truly blended learning experience that demystifies math for students. The user-friendly design and format of our resources provides not only the best classroom-based professional guidance, but many activities, lesson plans, rubrics, and templates to help you implement changes at your own pace in order to sustain learning improvement over time. We are committed to empowering every learner. With our forward-thinking and practical offerings, Corwin Mathematics helps you enable all students to realize the power and beauty of math and its connection to everything they do.

Warm Regards,  
The Corwin Mathematics Team
